

SHON HARRIS CISSP TRAINING RELAUNCHED

Subject: FOR IMMEDIATE RELEASE: Shon Harris Cybersecurity Training Re-Launched

Subtitle: Shon Harris Cybersecurity Training Returns Pursuant to Acquisition of Logical Security by Human Element, LLC. CISSP Certification Course First to be Released.

June 27, 2016 - Annapolis, MD. Human Element, Inc. announced today it has completed the updating of the Shon Harris CISSP security certification course and will begin public-enrollment classes this summer. Combining Shon Harris' unique training style with instruction by security industry veterans, Shon Harris Training will set a new bar for quality in cybersecurity training.

"Shon Harris Training^(SM) has long been considered to be the benchmark for excellence in cybersecurity technical education," remarked Steve Bennett, Human Element CEO. "The return of her training method and passion for excellence fills a much needed gap in the security training marketplace." Shon Harris authored over 10 security-related courses and several books, including the CISSP All-In-One Exam Guide (McGraw Hill, 2004) which has sold over two million copies and is in its 7th edition. Ms. Harris died in 2014 at the age of 46, leaving a gap broadly felt throughout the industry. The assets of her company, Logical Security, were acquired by Human Element in 2015.

"We are proud to be able to carry on Shon's legacy of quality," continued Mr. Bennett. "Shon Harris Training will be marked by excellence in every aspect: the most experienced instructors, the best classrooms, the most engaging curriculum, the best training venues – even the best food. Nothing will escape our intense focus on doing things the way Shon would have done them." Human Element will augment the delivery of Shon Harris Training with online materials, including audio lectures, sample exam questions, and a test simulator. An interactive online self-study CISSP course with videos will also be available in the Fall of 2016.

Shon Harris CISSP classes will begin in July in the Washington, DC area and expand to other metro markets throughout the coming year. Human Element has brought together a team of cybersecurity experts who worked with Ms. Harris and are intimately familiar with her style of teaching to update course materials. CISSP course updates include re-alignment to the new eight-domain structure introduced by (ISC)2 in 2015. Additional Shon Harris courses including Certified Ethical Hacker, Security+, and Certified Information Security Manager (CISM) will be released in the coming months. A calendar of classes is available at www.humanelementsecurity.com/course-schedule. Human element also offers customized security training for corporate clients with dedicated delivery on-site.

Human Element, LLC is an information security consulting and training firm located in Crownsville, Maryland. Founded in 2015, Human Element provides a full suite of cybersecurity services including vulnerability assessments; governance, risk, and compliance; architectural design and implementation; and incident response. Human Element differentiates its services by offering a Human-Based Cyber Defense™ dimension to each element of the security program, in addition to Shon Harris™ technical certification training for cybersecurity professionals. Additional information is available at www.humanelementsecurity.com.

Certified Information Systems Security Professional (CISSP) is an information security certification governed by the International Information System Security Certification Consortium, also known as (ISC)². Security Plus is an information security certification governed by the Computing Technology Industry Association (CompTIA).
